Dear Reader, Welcome to my Cover Letter, in it I will list some things about myself, but nothing better than talking 1x1 to introduce myself better Thanks.

I have worked for 4 years in the digital market such as creating a website, creating images for advertisements and editing videos... I know a little about everything that involves digital marketing and I have worked advertising products on Facebook ads and Google ads platforms.

I have a YouTube channel where I help other people to have a better mentality and always want more, like changing parents, finding another job...

They always want more from life, and not stand still and watch time pass...

I am writing to express my interest in job opportunities as a Full Stack Developer I am a dedicated student, currently in the process of completing my degree at Dev. Full Stack Code Institute, and expected to graduate in February 2025. I look forward to entering the professional world and applying my passion for software development in a challenging environment and dynamic.

During my studies, I acquired a wide range of technical skills, including knowledge of front-end and back-end programming languages such as JavaScript, HTML, CSS, Python, and popular frameworks such as React, Node.js, and Django. Additionally, I developed skills in relational and non-relational databases, version control, and agile software development methodologies.

Although I have not yet completed my degree, I am committed to continuing to learn and improve my skills. I am particularly interested in opportunities that allow me to work on challenging projects and collaborate with a talented team to create innovative solutions.

I am aware that many companies value practical experience as much as academic training, and I am willing to work hard to gain that experience. I am confident that my passion for technology, my work ethic, and my willingness to learn quickly will make me a valuable member of the team.

I would like to discuss how my skills and experience can be applied to meet your company's needs. I am available for an interview at any time that suits you, and I will be happy to provide more information about my experience and academic record.

Thank you in advance and I look forward to the opportunity to contribute to the success of your company as a Full Stack Developer.

Just like everyone else, there is always a beginning, this is mine.

I hope you find what you are looking for in this SHORT LETTER OF PRESENTATION.

Yours sincerely,

Carlos Henrique
